

Celsius

Millionaire

Born:

26-08-1989

Pedigree:

Bellman x Bell

Produced 1 million doses:

Total production:

More than 1 million doses

Inheritance

Etazon Celsius was the TPI leader in the US, and remained in the top five TPI for more than two years, leading the charts for four indexruns in a row, being more than 200 TPI points higher than the number-two sire. Celsius breeds good milk production, udders and legs.

General information

Sunny Boy has given The Netherlands back esteem in international cattle breeding. Celsius as a worldwide used sire gave the real recognition. Celsius daughters are praised for their fine conformation and also in the milking parlour they perform.

Important progeny

Several of CRV's top bulls like Alexander, Canvas RF, Mistral and Laarman-Red are from Celsius dams, with other being sired by his sons Cello and Major.

Testimonial 1

'Her udder is so extremely strong that her back teats even cross,' says Jan Oomen, about Celsiusdochter Havep CL Damler, which became champion middle class at the winter show in Etten-Leur (NL) in February 1999. 'Out of the twenty Celsius daughters that we are milking, Damler stands out in production. But they all are the best for lactation value.'

Testimonial 2

Dick Laan's Trien 481 in Woerden (NL) has the best index of all Celsius daughters: 'She produces milk so easily that one in fact cannot feed her enough.'
