

Lord Lily

Millionaire

Born:

06-06-1991

Pedigree:

Blackstar x Rotate

Produced 1 million doses:

2000

Total production:

1,238,421 doses

Inheritance

Etazon Lord Lily scores points on longevity. Big dairy-like cows with sloped rumps and functional udders and feet and legs. Good traits for udder health and calm temperament. As one of the most successful Blackstar sons in the world, he combines excellent type with high production.

General information

Lord Lily, also called the Black Pearl, made his debut April 1996. Nearly half of the doses produced were sold abroad, particularly to the UK, relatively more than contemporary Cash did. He died in 2002.

Progeny

As a sire Lord Lily has left his marks everywhere. Internationally many sons made their breakthrough with beautiful inheritance figures, such as VAH Wonderboy, Barnkamper Donjuan, Cliff, Eros 94, Lord Bailey, Hunter, Grandprix en Sinatra. The last three of them have been used frequently internationally as a sire, just like their father.

Testimonial 1

'We have a Lord Lily heifer in lactation and some yearlings being raised that look beautiful. They all have a wonderful character. I decided right away to order some new doses, because I don't want to miss such a super bull. In short, milk plus, protein plus and conformation plus: just pure class.'
William Potman, Markelo (NL)

Testimonial 2

Thomas and Nancy Murray from Murinda Holsteins, Waterloo (New York), had the first Lord Lily daughter to be milked in the US in 1999. The heifer Beachlawn Blwood L Lilly calved at the age of 22 months. Nevertheless she stood at 1.56 metres tall! 'Lilly is one of our most promising heifers. Although she calved at a young age, she is a strong dairy-like cow. Everyone who sees her is impressed. Her beautiful udder milks out well. I really think she is great,' says a proud Murray. Lilly has nine bull contracts with AI organisations all over the world. This month she produced eight first class embryos by Addison. Also the four Lord Lily yearlings look promising, which has made Murray decide to use Lord Lily again plenty.

Testimonial 3

Beltrame Renato's Beltra Farm is situated on the Italian island Sardinia. 'I use Lord Lily because the bull perfectly answers to my required qualities: fine dairy-like cows with first class udders and good protein,' explains Bertrame.
